

COTTEY
Shaping your own destiny

WIRELESS NETWORK ON CAMPUS

Welcome future Cottey students!

Each student pays a technology fee each semester that provides wireless access to the Internet and computer suites and labs. Some students chose to bring their own computer so they have access anywhere and anytime on campus. If you plan to bring a computer, be sure that it meets or exceeds the below requirements.

Processor:	2 GHz processor
Memory (RAM):	512
Free space on hard drive:	1000 MB
Wireless network card:	A 802.11b/g wireless network card supporting WPA2
Operating system:	Windows XP w/ Service Pack 2 or Windows Vista
Software:	Internet Explorer v7 or v8 Up-to-date antivirus software Firewall enabled in operating system

In most instances computers manufactured since 2005 will support Cottey's security requirements. It is your responsibility to make sure your computer and wireless network card supports the WPA2 standard. Cottey computers use Microsoft Office 2003 and 2007, so you may want to have a compatible word processing package such as Microsoft Office Student Edition. Cordless 2.4 GHz phones are not permitted in the residence halls as they interfere with the wireless network.
